DETAILED ACTION

Status of Claims

1. This action is in response to the decision by the Board of Patent Appeals and Interferences filed on 12 August 2005.
2. Claims 24-32 are currently pending and have been examined.

Drawings

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are handwritten informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 24-32 are allowed. See Reasons for Allowance under separate heading.

Reasons For Allowance

5. The following is an Examiner's statement of reasons for allowance:

None of the art of record, taken individually or combination, disclose at least the method step of *capturing a response message composed by the recipient when the mail piece is*

delivered. More specifically, the prior art of record fails to disclose that a response message is composed by a recipient. As per the BPAI, "We have reviewed pages 27 and 37 cited by the Examiner to teach the *response message composed by the recipient*. While these pages clearly teach a response from the recipient, they do not teach that the response is *a message composed by the recipient*. We have also reviewed the remainder of Kara and find nothing that cures this defect in the Examiner's rejection."

6. Claims 24-27 and 29-32 are distinguished over the closest prior art of Kara, PCT Publication WO 99/21330, which teaches all well-known methods for (1) delivering a message to the intended recipient will be used and (2) evidence of such receipt will be captured, including the recipient's signature, again using well-known methods (P17, L21-23; P27, L19-21; P36, L13-16; P37; L19-20). As recited in independent claim 24, it is clear that the Applicant's invention is distinguished over the Kara invention in at least the method step of *capturing a response message composed by the recipient when the mail piece is delivered*. Although Kara does disclose scanning images of mailpieces, Kara does not disclose a response generated by a recipient.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
 - Durst et al. (US 4,800,504 A) discloses an Interactive outgoing and incoming mailpiece processing system.
